***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) **1-6 and 9-18**, drawn to a structure control method.

Group II, claim(s) **7**, drawn to a producing method of a nano-scale low dimensional quantum structure.

Group III, claim(s) **8**, drawn to a producing method of a nano-scale low-dimensional quantum structure.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups II and III do not require wherein the low-dimensional quantum structures comprise nanotubes or nanoparticles; wherein the low-dimensional quantum structures comprise carbon or boron nitride; wherein the low-dimensional quantum structures have a single-walled structure; or wherein the electromagnetic wave is a laser beam as required in Group I.

Group II requires removing a structure with the density of states resonating with the electromagnetic wave; and Group III requires retaining a structure with a density of

states not resonating with the electromagnetic wave. The different method conditions of these Groups would make the methods unobvious variants.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
